

***Premium Add-on device for your home***

The Intelligent Valve Controller is an advanced device designed for effective water pipe control. Its features include ABS flame-retardant housing, operating temperature range of -10-50°C, ZigBee connectivity, 1.6Mpa valve pressure, and motor power of 0.3W/5W. This controller ensures efficient valve closure within 5-10 seconds and offers excellent adjustability for center axis alignment. It comes with a 12V-1.5A power adapter and metal bracket for seamless installation. Its robust construction and smart controls provide a comprehensive solution for monitoring and managing your home's water system.

***Features***

- **Advanced device designed specifically for effective water pipe control.**
- **Constructed with ABS flame-retardant housing to ensure safety.**
- **Operates efficiently within a temperature range of -10 to 50°C.**
- **Provides ZigBee/WiFi connectivity for smart control and monitoring.**
- **Capable of handling valve pressure up to 1.6Mpa.**

**Specification**

- Model Number: SM-AW713Z
- Power supply: DC12V
- Working Temperature: -10°C ~ +50°C, without condensation
- Connections: ZigBee 2.4G
- Product Size: 93.5×70×78.5mm
- Motor Power: 5W
- Valve Pressure: 1.61pa
- Torque: 40kgt.cn
- Automatic Mixing Valve Time: 5~10 seconds
- Electric Actuation Time: 5~10 seconds
- Valve Specifications: 13 mm, 20 mm, 1 inch
